

Emotional Release Reflexology

according to Helga Dittmann

Course I, April 22nd -23d, 2024 in Portsmouth NH

In this course you will get a toolkit to help your clients deal with repressed, painful emotions.

While working on the reflex areas of the feet, you will learn to ask specific questions about your client's body awareness and inner images.

In combination of the stimulation of a blocked reflex zone, deep relaxation and questioning techniques, it becomes possible that forgotten and yet stressful experiences become conscious again and can be processed through the gentle guidance by the reflexologist.

This has a positive effect on the client's health and attitude towards life.

You can integrate the knowledge you learn in this first course into your reflexology sessions immediately afterwards. Even though you will gain additional knowledge in further courses.

You will also learn to guide your client back into a positive state of mind and relaxation whenever the need arises.

In addition to a deep understanding of the topics addressed, you will receive intensive practical training in the method.
